What Is ARTFORWARD?

ARTFORWARD fosters sustainability in the creative industries by equipping secondary school students with education and practical experience in sustainable art, architecture, and fashion design. Through innovative learning modules, business partnerships, awareness campaigns, and digital tools, the project empowers students to become leaders in sustainable creativity – contributing to a greener, more innovative future for society as a whole.

Project Activities

1

Educational Modules

Development of learning modules on sustainable art, architecture, and fashion design.

2

Masterclass Academy

Collaboration with sustainable start-ups, enterprises, and innovation hubs in the creative industries.

3

Traineeships & Internships

Hands-on placements for students in sustainable businesses.

4

Awareness Campaigns

Workshops, seminars, and conferences to educate the public on sustainable practices.

EDUCATIONAL MODULES

Sustainable Art, Architecture & Fashion Design

ARTFORWARD develops replicable learning modules for secondary schools, designed to innovate teaching methodologies and enhance students' skills in sustainable creative practices. These modules serve as a model for other educational institutions to adopt and adapt.

Masterclass Academy

Students engage directly with sustainable start-ups, enterprises, and innovation hubs across the creative industries – gaining real-world insights into eco-friendly business practices and alternative production methods.

Start-ups

Emerging sustainable creative businesses

Enterprises

Established industry partners

Innovation Hubs

Centres of creative excellence

Traineeships & Awareness

Traineeships & Internships

Students gain hands-on experience through placements in sustainable businesses, bridging classroom learning with professional practice in the creative industries.

Awareness Campaigns

Workshops, seminars, and conferences raise public awareness of sustainability in art, architecture, and fashion design – fostering a long-term culture of eco-friendly practices.

Project Results

Replicable Model

Learning modules that other institutions can adopt to innovate their teaching methodologies.

Innovation Showcase

Platform to present innovative sustainability projects to wider audiences.

Enhanced Skills

Students gain practical and theoretical skills in sustainable creative practice.

Eco-Friendly Culture

Fostering long-term sustainable practices across art, architecture, and fashion sectors.

Alignment with EU Goals

- ❑ ARTFORWARD accelerates change toward sustainable practices in art, fashion, and design – supporting the EU's objective to achieve **carbon neutrality by 2050** and promoting innovation and competitiveness.

The project encourages students and businesses to embrace eco-friendly practices and investigate alternatives to traditional production methods, contributing to the EU's broader environmental and economic goals.
